

CHIP & PIN DEBIT

V Pay

V PAY is a chip-only, PIN-only debit card, which means it is incredibly simple for merchants to accept, and the risk of fraudulent or disputed transactions is virtually eliminated. V PAY is fully compliant with the requirements of the Single European Payments Area (SEPA).

In order to accept V Pay we can provide you with an EMV-compatible terminal (link from EMV) which reads the chip on the card and authorises payment once the PIN has been entered.

Benefits of V Pay Acceptance

- Customer-friendly
- Additional sales as a result of spontaneous purchases
- No cash theft risk
- High security for merchants and customers
- Acceptance of this debit card is cost-effective for merchants
