

# Software Supported Peripherals

## Mag-Stripe Readers

Three-track card reader for efficient transactions in a card present environment.

## Single-Sided Check Imagers

High quality check imager with check "franking" ability to automatically void checks processed electronically, helping to ensure compliance when converting checks in a customer present environment. Also incorporates a three-track card reader to process all payment type through one simple-to-use peripheral.

## PIN Pad

Safe and secure PIN pad for acceptance of PIN-based transactions such as PIN Debit or Electronic Benefits Transfer (EBT).

Fast and efficient check imager to efficiently convert paper checks into electronic transactions. Integrated three-track card reader adds value by supporting card-swiped transactions in a cardholder present environment.

## Receipt Printer

Efficient and cost-effective thermal printer quickly and quietly provides traditionally formatted transaction receipts.

## Double-Sided Check Imager

Captures a high-quality two-sided image of the check and "franks" the check "Electronically Presented" in seconds allowing all types of checks to be processed electronically. A magnetic card reader for credit, debit and gift cards is also part of the unit, keeping counter tops clutter free.
