

Commerce SDK

Faster, Secure Payments Solutions for Your Customer

Commerce SDK (Software Development Kit) accelerates and simplifies the process of implementing secure payment solutions. We've combined our payment processing expertise with comprehensive security components, including EMV and encryption, into one fully integrated package.

WHAT ARE THE BENEFITS OF COMMERCE SDK?

- **Speedy EMV implementation.** EMV chip card implementations that have historically stretched for months, or even years, can now be up and running in a matter of weeks.
- **More Ways to Pay with More Devices.** Process payments via our Converge omni-commerce gateway and easily connect the POS (Point-of-Sale) to any necessary hardware.
- **Mobile Payments made easy.** Let Commerce SDK help you get mobile payment apps up and running quickly on tablet solutions, or add in mobile wallet functionality, like Apple Pay®.
- **Scalability.** Designed for ease of use by businesses of all sizes, from small and medium-sized businesses to Enterprise level organizations.
- **Cross Platform Flexibility.** Commerce SDK can help you quickly build the app that fits your customers' needs, whether for smartphone or desktop use.

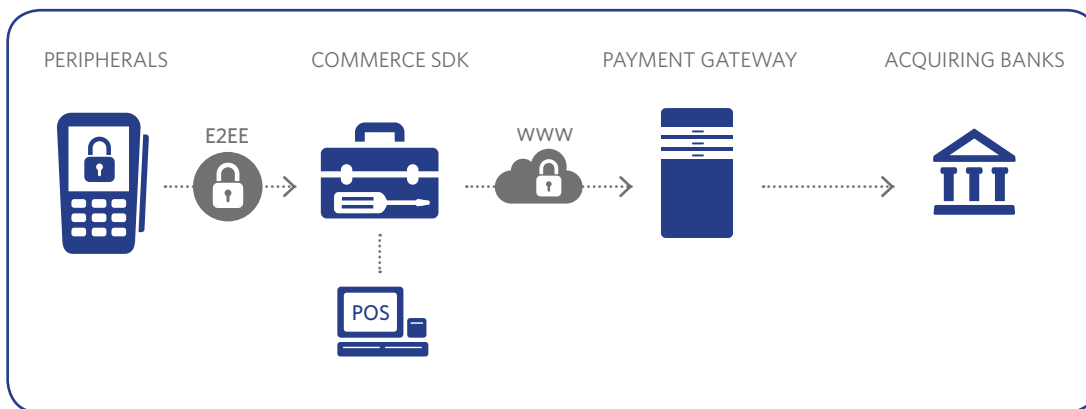

A developers' toolkit for the speed of business

LET'S TALK:

Commerce SDK Powers Your Payment App

- **Pre-certified EMV package.** Reduce the lengthy card scheme certification process. Our solution connects EMV certified hardware and software with a single integration.
- **Expanding list of EMV hardware terminals and other peripherals.** Commerce SDK provides terminal options, so you can find the best equipment to suit your business needs. Integration with printers and other peripherals minimizes your coding efforts and eliminates the need to keep up with multiple interfaces.
- **End-to-end encryption of card data.** Card data is encrypted on the terminal when a cardholder swipes, taps or dips their card, and remains encrypted until it reaches our gateway.
- **Support for multiple operating systems.** Whether you're coding for iOS, Android or Windows, Commerce SDK can help.
- **Processing through our Converge omni-commerce gateway.** Easily accept consumer transactions, where ever they want to pay: Online, In-Store and On the Go.
