

Hospitality Payment Processing

Rest easy with the right secure payment solutions

We understand payment processes can vary between brands or even properties depending on technology infrastructure and configurations. Future-proof your payment investment today with our fully certified EMV platform that saves you valuable IT production time and keeps you ready for the future of payments.

Simplify™ - Nothing to Find, Nothing to Steal

Simplify, powered by our Safe-T Security Solutions, is a semi-integrated EMV certified solution that delivers point-to-point encryption (P2PE) and tokenization to isolate sensitive payment related information from the Property Management System (PMS) and Point-of-Sale (POS). This layered approach to security not only protects your brand(s) from the risks associated with a card data breach, it also reduces the burdens associated with PCI compliance.

Safe-T Security Solutions:

- **Encryption**

Encryption is the strongest protection for card data when it's in transit. From the moment a payment card is swiped, inserted (dipped), or tapped (contactless) at a terminal, sensitive card data is protected from fraudsters as it travels from your place to ours.

- **Tokenization**

Tokenization protects card data when it's in use and at rest. It converts or replaces cardholder data with a unique token ID to be used for subsequent transactions. This solution eliminates the possibility of having card data stolen because it no longer exists within your environment having been replaced with the token ID.

- **EMV - Chip Card Technology**

EMV is a proven technology, reducing card-present fraud globally across industries; prompting the introduction of chip card contact and contactless technology in the U.S. We have certified EMV solutions available now to help you prevent card-present fraud liability.

*Can your brand
withstand a card data
breach?*

*We can help by isolating
sensitive card data from
your PMS and POS.*

Ask us about Simplify!

One Source for Payment Processing

We focus on payments so you can focus on your guests

With a solution set developed specifically for the lodging sector, it's no wonder Elavon is a provider of choice across the hospitality industry. We understand the processing requirements of national chains, franchises and independent ownership. And our investments in hospitality-specific applications and features have helped many lodging organizations optimize their payments process.

- **PCI Certified Hosted Payment Gateway**

Our Fusebox gateway seamlessly integrates with many of the leading PMS and POS systems. Fusebox is uniquely flexible enough to offer a secure end-to-end payment solution when combined with our acquiring service, or can be a standalone service that securely routes payments to virtually any of the leading processors.

- **VAR & ISV Integrated Solutions**

We support seamless integrations with the leading value-added resellers and software providers to the hospitality industry. Offering simple API configurations that allow a one-to-many connection for your PMS and POS technology.

- **Reporting Solutions at Your Fingertips**

Analyzing your real-time electronic payments can be a snap with our online reporting tools. View transaction data for one property or aggregated across multiple properties and brands 24/7. View by card type, amenity or find information by interchange qualification.

- **Payment Processing Made Easy**

Our single platform global network provides a reliable solution for the hospitality industry to accept payments. We help you securely accept all payment types, improve cash flow, minimize your collections risk, and better serve your customers, all while helping protect cardholder data and mitigate the risk of a security breach. We provide full authorization, processing, settlement and support for your Visa®, MasterCard®, American Express®, Discover® Network, JCB, China UnionPay and Diner's Club International® credit and debit card transactions.

In addition, our network enables your locations to accept:

- EMV Cards (i.e. Chip Card)
- Contactless Payments (i.e. Apple Pay™)
- PIN Debit Cards

WHY ELAVON?

ONE SOURCE FOR PAYMENT PROCESSING

We provide front-end authorizations, back-end settlement, and all customer support functions. You have one convenient source for all your payment processing needs.

FLEXIBLE PAYMENT OPTIONS

You can count on us to deliver processing services designed specifically for the hospitality industry - like integrated EMV and security solutions, interchange optimization, and reporting tools.

SUPERIOR CUSTOMER SERVICE

Customer support is available whenever you need it. A dedicated and well-trained staff of hospitality-focused service professionals operates a 24/7 call center for client assistance.

YOU'RE IN GOOD COMPANY

We process over 3 billion transactions annually for more than a million customers worldwide.
