payment solutions

## Restaurant Payment Processing

With a solution set developed specifically for the restaurant sector, it's no wonder Elavon is the provider of choice across the hospitality industry. We understand the processing requirements of national chains, franchises and independent ownership. Our investments in restaurant-specific applications and features have helped many food and beverage organizations optimize their payments process.

### CREDIT & DEBIT PAYMENTS

Our robust network has set the standard for the food and beverage industry. We can help you improve cash flow, minimize your collections risk, and better serve your customers, all while helping protect cardholder data and mitigate the risk of a security breach.

We provide full authorization, processing, settlement and support for your Visa®, MasterCard®, American Express®, Discover® Network, JCB, China UnionPay and Diner's Club International® credit and debit card transactions. In addition, our network enables your restaurant to accept: EMV (i.e. Chip Card), PIN Debit Cards and Contactless (i.e. Apple Pay®).

LET'S TALK:

### WHY ELAVON?

- Process over **3 billion** transactions annually for more than a million customers worldwide.
- Over **\$300 billion** worth of commerce processed annually.
- **One source** for payment processing from front-end authorizations to back-end settlement and support.
- Average transaction processing time is 10 milliseconds, with a **99.9% uptime**.
- One single, **award winning** international processing platform spanning multiple geographies and channels.
- Dedicated, well-trained, multi-lingual staff of restaurant-focused service professionals **available 24/7**.

# One Source for Payment Processing

We understand payment processes can vary between brands, or even locations depending on technology infrastructure and configurations. Our fully certified EMV platform saves you valuable IT production time and keeps you ready for the future of payments.

## **SECURITY MADE EASY WITH SIMPLIFY**

Don't lose your appetite worrying about a card data breach. Simplify is a semi-integrated solution that isolates sensitive payment related information away from the Point-of-Sale. Encrypting the payment information at the point of entry, and then protecting it all the way through the entire payment cycle. Only a unique token is returned back to the Point-of-Sale; leaving nothing to find, and nothing to steal in case of a breach.

## **OMNI CHANNEL PAYMENT PLATFORM**

With our Converge payment platform, you can have a complete solution to support all types of payment transactions including online, mobile, and in-store as well as by mail and phone. Converge supports a full range of payment types: credit and debit cards, electronic checks, gift cards, recurring and installment payments.

## **PCI CERTIFIED HOSTED PAYMENT GATEWAY**

Our Fusebox gateway seamlessly integrates with leading Point-of-Sale (POS) systems. When combined with our acquiring service, Fusebox offers a flexible and secure end-to-end payment solution. Alternatively, Fusebox can serve as an agnostic gateway securely routing payments to virtually any of the leading processors.

## **VAR & ISV INTEGRATED SOLUTIONS**

We support seamless integrations with the leading value-added resellers and software providers to the restaurant industry. Offering simple API configurations that allow a one-to-many connection for your Point-of-Sale (POS) technology.

## **PCI-VALIDATED POINT TO POINT ENCRYPTION (P2PE)**

As an end-to-end payment solutions provider, Elavon provides you a single relationship for a PCI-validated P2PE solution from acquiring to gateway.

## **SAVE MONEY WITH OUR MANAGED INTERCHANGE SERVICE**

Interchange can be the largest component of transaction processing costs for any restaurant. Our Managed Interchange Service team uses advanced analytics to discover high-risk interchange areas costing your location(s) money. Recommendations are made that focus on total processing cost reductions for true material savings.

## **REPORTING SOLUTIONS AT YOUR FINGERTIPS**

Analyzing your electronic payments can be a snap with our Payments Insider online reporting portal. View transaction data for one location or aggregated across multiple locations 24/7. View batches by card type or find information on interchange qualification.

## **REVIEW, ANALYZE AND MANAGE PAYMENT TRANSACTION DATA**

Our online transaction reporting and data analysis tools allows you to gather payment data intelligence, identify improvement areas and manage your restaurant's case activity. Key features include customizable reports, dashboard transaction summaries, workflow management, chargeback management and targeted marketing solutions.

## **IMPROVE CASH FLOW WITH FAST FUNDING**

Opting for Fast Track Funding, our Same Day ACH solution, means we can fund you within 24 hours of your batch submission.\*

\*Applies to funding payments of \$25k or less
